Optic nerve heads	C:D	C:D	
Intraocular pressure			Applanation/non contact/
Time	mm Hg	mm Hg	Other

Additional information

Cycloplegic refraction ☐Dilated fundus examination ☐**GOS 18 Part One – This part must accompany any referral made to an Eye Department**

STATEMENT: The reason for this referral has been explained to the patient or guardian who agrees to it. The patient or guardian also consents to information being exchanged between the Hospital Eye Service, their General Medical Practitioner, and optometrist or ophthalmic medical practitioner (delete any not consented to).

If appropriate, Guardian's name and address

Signed (optometrist/OMP) _____

GOC/GMC No _____

Optometrist Guidance

Most referrals to the HES are via "Choose and Book" (CaB). This system provides two ways for a GP surgery to find an appointment in the correct service (e.g. clinic). Please note that the person doing this booking may *not* be a doctor.

1. Via a "Clinic Type".
 - a. These Clinic Types are fixed and are the same throughout England.
 - b. When a Clinic Type is entered all the services linked to it are displayed. For a simple one (such as Cataract) this will show all the clinics seeing cataracts and nothing else.
 - c. Other Clinic Types may result in a range of different clinics being offered. However these clinics may only see a subset of the conditions covered by the Clinic Type. For instance Oculoplastic / Orbit / Lacrimal may link to a nurse led cyst service, a lid malposition (entropion etc) service or a service exclusively for lacrimal problems.
 - d. So if a range of different types of clinic are offered the surgery will need to select the correct one. They can do so on the basis of a "Clinic Term" you have entered (see below) and/or the additional information you put on the free text part of the form.
2. Via a Clinical Term.
 - a. If a clinical term (such as "Entropion") is entered in the search field in CaB then this will show all the services which see patients with this problem or diagnosis.
 - b. This is particularly useful for conditions that the GP may not recognise, such as "Keratoconus" or "Macular Dystrophy"

Please indicate only one "Clinic Type". However you may offer more than one Clinical Term. Please try to provide both a Clinic Type and Clinical Term for all patients.
